Professional Summary

While studying foreign languages at university, I learned more about future career opportunities and I found myself very interested in software engineering. After two years of study, I made the decision to switch my major and follow my passion. With my proficiency in English, dynamic personality, and strong critical thinking abilities, I approached the software major through the Java Programmer course at iViettech quite easily. This course allowed me to acquire knowledge in Java, JavaScript, and other relevant technologies. Proven ability to work in a fast-paced environment with high-quality standards and strict deadlines, I am confident in my ability to excel and eager to learn from experienced professionals.

Education

Da Nang, Viet Nam

2019 - 2021

English and French
